

CO.DON AG

Company Outline

- **Contact:** Dr. Achim Simons
- **Email:** a.simons@codon.de
- **Website:** <https://www.codon.de/>
- **Founded:** 1993
- **Profile:**

CO.DON AG is a biopharmaceutical company focused on the development, production and marketing of cell-based pharmaceutical products for the joint preserving, regenerative treatment of articular cartilage defects. We are based in Leipzig and Teltow with subsidiaries in Switzerland, the Netherlands and the UK.

Our production facility offers modern technology for the GMP-compliant cultivation of human cells- to produce our own products and for contract manufacturing. To fulfill the high quality standards, we have a new highly automated production site in Leipzig which is also our headquarter.

Products

Spherox

- ATMP, personalised, autologous cell therapy product for minimally invasive treatment of cartilage defects in the knee joint, using the patient's cartilage cells (by means of M-ACT), authorized in the EU, UK and Switzerland
- Key feature: cartilage defects of up to 10cm² can be treated, helps to relieve pain and improving other symptoms such as the functionality/mobility of the knee

Intended Cooperation

- Cooperation with license partners that have access to GMP approved laboratories, set up to cultivate human cells.
